

STUDY GUIDE — BANK 5 (50 QUESTIONS)

1. In conservation management, what best describes Law enforcement?

- A. Ensuring compliance with wildlife and environmental laws
- B. Habitat restoration
- C. Population monitoring
- D. Adaptive management

 **Correct answer: A**

2. In conservation management, what best describes Compliance?

- A. Following laws and regulations
- B. Ignoring rules
- C. Adaptive management
- D. Monitoring

 **Correct answer: A**

3. In conservation management, what best describes Regulation?

- A. Rules implementing laws
- B. Public education
- C. Monitoring
- D. Research

 **Correct answer: A**

4. In conservation management, what best describes Legislation?

- A. Formal laws passed by government
- B. Voluntary guidelines
- C. Research studies
- D. Public outreach

 **Correct answer: A**

5. In conservation management, what best describes Policy?

- A. Laws and regulations guiding management
- B. Monitoring programs
- C. Habitat restoration
- D. Research only

 **Correct answer: A**

6. In conservation management, what best describes Environmental ethics?

- A. Moral principles guiding environmental behavior
- B. Wildlife population trends
- C. Habitat destruction
- D. Resource extraction

 **Correct answer: A**

7. In conservation management, what best describes Stewardship?

- A. Responsible management of natural resources
- B. Resource exploitation
- C. Habitat loss
- D. Overharvest

 **Correct answer: A**

8. In conservation management, what best describes Public participation?

- A. Involvement of the public in decision-making
- B. Government-only management
- C. Private ownership
- D. No management

 **Correct answer: A**

9. In conservation management, what best describes Outreach?

- A. Communicating conservation information
- B. Enforcement
- C. Monitoring
- D. Habitat destruction

 **Correct answer: A**

10. In conservation management, what best describes Environmental education?

- A. Educating the public about conservation
- B. Habitat loss
- C. Resource extraction
- D. Poaching

 **Correct answer: A**

11. In conservation management, what best describes Incentives?

- A. Benefits encouraging conservation behavior
- B. Penalties only
- C. Regulations
- D. Enforcement

 **Correct answer: A**

12. In conservation management, what best describes Funding?

- A. Financial resources for conservation
- B. Habitat destruction
- C. Poaching
- D. Overharvest

 **Correct answer: A**

13. In conservation management, what best describes Economics?

- A. Allocation of scarce resources
- B. Wildlife biology
- C. Habitat restoration
- D. Climate change

 **Correct answer: A**

14. In conservation management, what best describes Cost-benefit analysis?

- A. Comparing costs and benefits of actions
- B. Habitat loss
- C. Species monitoring
- D. Law enforcement

 **Correct answer: A**

15. In conservation management, what best describes Sustainable development?

- A. Meeting present needs without harming future generations
- B. Resource exploitation
- C. Habitat destruction
- D. Overharvest

 **Correct answer: A**

16. In conservation management, what best describes Human dimensions?

- A. Social factors influencing conservation
- B. Wildlife population size
- C. Habitat connectivity
- D. Climate patterns

 **Correct answer: A**

17. In conservation management, what best describes Stakeholder analysis?

- A. Identifying affected groups
- B. Habitat restoration
- C. Population monitoring
- D. Adaptive management

 **Correct answer: A**

18. In conservation management, what best describes Conflict resolution?

- A. Addressing disagreements among stakeholders
- B. Habitat loss
- C. Species decline
- D. Climate change

 **Correct answer: A**

19. In conservation management, what best describes Risk assessment?

- A. Evaluating potential negative outcomes
- B. Habitat restoration
- C. Public outreach
- D. Monitoring

 **Correct answer: A**

20. In conservation management, what best describes Decision support tools?

- A. Tools that aid management decisions
- B. Enforcement mechanisms
- C. Education programs
- D. Funding sources

 **Correct answer: A**

21. In conservation management, what best describes Adaptive governance?

- A. Flexible institutions that learn and adjust
- B. Rigid rule systems
- C. No management
- D. Private-only control

 **Correct answer: A**

22. In conservation management, what best describes Transparency?

- A. Open access to information
- B. Secret decision-making
- C. Enforcement only
- D. Regulation

 **Correct answer: A**

23. In conservation management, what best describes Accountability?

- A. Responsibility for decisions and actions
- B. Ignoring outcomes
- C. Habitat loss
- D. Overharvest

 **Correct answer: A**

24. In conservation management, what best describes Equity?

- A. Fair distribution of benefits and burdens
- B. Equal population sizes
- C. Habitat quality
- D. Species richness

 **Correct answer: A**

25. In conservation management, what best describes Justice?

- A. Fair treatment in environmental decision-making
- B. Law enforcement only
- C. Habitat restoration
- D. Monitoring

 **Correct answer: A**

26. In conservation management, what best describes Traditional ecological knowledge?

- A. Indigenous and local knowledge systems
- B. Modern scientific methods only
- C. Policy frameworks
- D. Enforcement strategies

 **Correct answer: A**

27. In conservation management, what best describes Co-production of knowledge?

- A. Integrating scientific and local knowledge
- B. Using science alone
- C. Ignoring local input
- D. Enforcement

 **Correct answer: A**

28. In conservation management, what best describes Scenario planning?

- A. Exploring possible future outcomes
- B. Predicting exact futures
- C. Monitoring only
- D. Enforcement

 **Correct answer: A**

29. In conservation management, what best describes Strategic planning?

- A. Long-term goal setting and actions
- B. Short-term response only
- C. Emergency management
- D. No planning

 **Correct answer: A**

30. In conservation management, what best describes Performance metrics?

- A. Measures of management success
- B. Habitat loss indicators
- C. Population decline
- D. Climate impacts

 **Correct answer: A**

31. In conservation management, what best describes Evaluation?

- A. Assessing effectiveness of actions
- B. Habitat destruction
- C. Overharvest
- D. Climate change

 **Correct answer: A**

32. In conservation management, what best describes Learning?

- A. Using outcomes to improve management
- B. Ignoring results
- C. Enforcement
- D. Regulation

 **Correct answer: A**

33. In conservation management, what best describes Innovation?

- A. Developing new solutions
- B. Maintaining status quo
- C. Habitat loss
- D. Overharvest

 **Correct answer: A**

34. In conservation management, what best describes Capacity building?

- A. Strengthening skills and institutions
- B. Habitat destruction
- C. Resource extraction
- D. Enforcement

 **Correct answer: A**

35. In conservation management, what best describes Leadership?

- A. Guiding people toward conservation goals
- B. Enforcing laws only
- C. Monitoring
- D. Funding

 **Correct answer: A**

36. In conservation management, what best describes Collaboration?

- A. Working together across sectors
- B. Independent action
- C. Conflict escalation
- D. No coordination

 **Correct answer: A**

37. In conservation management, what best describes Partnerships?

- A. Cooperative relationships
- B. Competition only
- C. Enforcement
- D. Regulation

 **Correct answer: A**

38. In conservation management, what best describes Networks?

- A. Connected organizations and actors
- B. Isolated agencies
- C. Single institutions
- D. Enforcement bodies

 **Correct answer: A**

39. In conservation management, what best describes Governance?

- A. Systems of rules and decision-making
- B. Species monitoring
- C. Habitat restoration
- D. Climate patterns

 **Correct answer: A**

40. In conservation management, what best describes Institutions?

- A. Organizations and rules guiding behavior
- B. Individual species
- C. Habitats only
- D. Ecosystems

 **Correct answer: A**

41. In conservation management, what best describes Organizational culture?

- A. Shared values and norms
- B. Habitat quality
- C. Population size
- D. Climate conditions

 **Correct answer: A**

42. In conservation management, what best describes Change management?

- A. Managing transitions and adaptation
- B. Maintaining status quo
- C. Ignoring challenges
- D. Enforcement

 **Correct answer: A**

43. In conservation management, what best describes Resilience?

- A. Ability to absorb disturbance and recover
- B. Resistance to any change
- C. Habitat loss
- D. Overharvest

 **Correct answer: A**

44. In conservation management, what best describes Social-ecological systems?

- A. Linked human and natural systems
- B. Wildlife populations only
- C. Climate systems only
- D. Economic markets only

 **Correct answer: A**

45. In conservation management, what best describes Transformational change?

- A. Fundamental shifts in systems
- B. Minor adjustments
- C. No change
- D. Overharvest

 **Correct answer: A**

46. In conservation management, what best describes Sustainability science?

- A. Interdisciplinary study of sustainability
- B. Wildlife biology only
- C. Policy enforcement
- D. Habitat restoration

 **Correct answer: A**

47. In conservation management, what best describes Systems thinking?

- A. Understanding interactions within systems
- B. Studying parts in isolation
- C. Ignoring feedbacks
- D. Enforcement

 **Correct answer: A**

48. In conservation management, what best describes Complexity?

- A. Multiple interacting components
- B. Simple cause-effect relationships
- C. Single variables
- D. Linear systems

 **Correct answer: A**

49. In conservation management, what best describes Uncertainty?

- A. Lack of complete knowledge
- B. Complete predictability
- C. No risk
- D. Full control

 **Correct answer: A**

50. In conservation management, what best describes Adaptive capacity?

- A. Ability to adjust to change
- B. Resistance to change
- C. Habitat destruction
- D. Overharvest

 **Correct answer: A**
